Mr. Jay Davidson
Southern Pipe & Supply Company, Inc.
4330 Highway 39, N.
Meridian, MS 39301

Re: Infringement of Landmark Technology A, LLC's Patent Rights

Dear Mr. Davidson:

We are intellectual property counsel for Landmark Technology A, LLC ("Landmark"). Landmark has exclusive rights to patents covering certain special-purpose computer, communication and network technologies relating to Internet searching, e-commerce, electronic bill pay, business-to-business transactions, multimedia data processing networks and mobile technologies. Landmark's widely regarded patented technology covers, among other things, special-purpose hardware and software systems supporting key transaction processes and features used in many electronic commerce systems, including structures which exchange business data amongst trading partners.

Landmark has licensed its patents to over 200 companies across various industries. Landmark's patents rank extremely high in patent citing activity and have been cited nearly 200 times by the USPTO whereas the average patent has only five citations during its lifetime. Highly cited patents are generally known to be of greater technical importance, and even fewer rise to the level of "pioneer patents" achieved by the Landmark patents.

Landmark believes that Southern Pipe & Supply Company, Inc. ("Southern Pipe & Supply") automated multimedia data processing network systems, particularly <https://www.southernpipe.com/Login> through practices U.S. Patent No. 7,010,508 C1 ("508 Patent"). You will find that the '508 Patent teaches and claims automated multimedia data processing network for processing business and financial transactions between entities from remote sites. This includes data processing systems wherein a computerized installation acts on inquiries and orders from stations [as do Southern Pipe & Supply's servers], communicates with stations which use program instructions and act as the user interface [as do those

devices interfaced to Southern Pipe & Supply's web servers in communication with Southern Pipe & Supply's servers], sequences are retrieved in a forwardly/backwardly chained response (as defined by the inventor) to data entered into a text input field [as seen in devices interfaced to Southern Pipe & Supply's web servers], and data is updated in a computerized installation storage [as per the functionality of Southern Pipe & Supply's web servers]. For example, the specific functionalities implemented by Southern Pipe & Supply using their servers and devices interfaced to Southern Pipe & Supply's web servers constitutes use of the technology taught within the meaning of Claim 1 of the '508 patent.

Landmark is currently offering Southern Pipe & Supply a non-exclusive license to its '508 patent, for \$65,000. This offer represents a substantial discount to the historic licensing price of Landmark's portfolio, and will not be available in the event of litigation.

We appreciate your attention to this matter and request a response within 15 days of this letter. Please contact me at the phone or email above, or contact my colleague, Jennifer Ishimoto, at ishimoto@banishlaw.com or (650) 241-2773.

Very truly yours,

Re: Infringement of Landmark Technology A, LLC's Patent Rights

Dear Mr. Davidson:

In October, Landmark offered a non-exclusive license to its '508 patent for \$65,000. A month has elapsed and Southern Pipe & Supply has not responded to Landmark.

The current amount for a non-exclusive license to Landmark's '508 patent expires December 27, 2019. Please contact me as soon as possible.

Very truly yours,
